ABOUT US

Modelers Music is the Italian duo swiftly defining the next generation of the Indie Dance and Melodic Techno scene. Born from a deep friendship and the union of two different generations, the project bridges the gap between sophisticated elite club music and raw dancefloor energy.

With over a decade of experience in the industry, the duo draws inspiration from the legendary sounds of Detroit and Berlin, crafting a style that is both impactful and unique. This expertise has made them a go-to name for high-profile remixes and collaborations, leading to a sound that feels global yet deeply personal.

Their trajectory has been marked by unparalleled validation from the industry's elite. Following successful releases on prestigious labels such as Multinotes and Moodmusic, their productions have gained consistent support from titans like Âme, Musumeci, Solomun, Lehar and many more. A defining milestone in their career was the invitation to open for Paul Kalkbrenner, a performance that solidified their status as an international act ready for the world's most demanding stages.
